Gemini Enterprise

AI Intelligence

OVERVIEW

Temporall is the leader in AI Behavioural Analytics. Our AI-powered platform Tempo offers the objective data foundation necessary to drive strategic decisions for IT and corporate leaders investing in the Google AI ecosystem, particularly high-value tools like Gemini Enterprise.

We eliminate the AI value paradox by quantifiably linking your Gemini Enterprise investments to tangible business outcomes. We empower organizations to predict, deploy, and optimize their Workforce AI investments to achieve higher levels of AI-enabled organizational performance.

GEMINI ENTERPRISE VALUE REALISATION

USAGE & ADOPTION

We perform rapid AI Readiness assessments using Gemini Enterprise usage and wider data sources - forecast your AI Change velocity, make data-driven deployment decisions, drive sustained usage, adoption, and AI fluency.

IMPACT

We track and measure the impact of Gemini Enterprise, link different levels of AI proficiency with work outcomes in productivity suites like MS 365/Copilot, Workspace, and monitor the impact on LOB performance over time.

COST MANAGEMENT

We continuously monitor utilization of Gemini Enterprise and other AI tools (Copilot, ChatGPT Enterprise) to support data-led procurement, and effective license allocation across your AI tool portfolio.

GOVERNANCE

We unify fragmented and siloed enterprise data into a centralized platform, providing the necessary auditable reporting evidence for organizational governance, oversight, and strategic workforce planning decision support.

HOW IT WORKS

We sync Gemini Enterprise telemetry to Temporall, delivering essential AI intelligence on the usage, performance, and impact of Agents. We enrich this data using proprietary user attributes, HR, and LOB Performance data, unifying and centralizing these sources to enable advanced data segmentation and directly linking AI usage and proficiency with measurable business outcomes.

"This dynamic insight [*sic Temporall*] enables users to analyze, understand, measure change, and drive an organization into the future."
