

# Gemini Enterprise

## AI Intelligence

## OVERVIEW

Temporall is the leader in AI Behavioural Analytics. Our AI-powered platform Tempo offers the objective data foundation necessary to drive strategic decisions for IT and corporate leaders investing in the Google AI ecosystem, particularly high-value tools like Gemini Enterprise.

We eliminate the AI value paradox by quantifiably linking your Gemini Enterprise investments to tangible business outcomes. We empower organizations to predict, deploy, and optimize their Workforce AI investments to achieve higher levels of AI-enabled organizational performance.

## GEMINI ENTERPRISE VALUE REALISATION

### USAGE & ADOPTION

We perform rapid 'AI Readiness' assessments using Gemini Enterprise adoption and wider data sources; forecast your AI Change velocity, support data-driven design and deployment decisions to drive sustained usage & AI fluency.

### COST MANAGEMENT

We continuously monitor utilization of Gemini Enterprise and other AI tools (Copilot, ChatGPT Enterprise) to support data-led procurement and effective license allocation across your AI tool portfolio.

### IMPACT

We track and measure the impact of Gemini Enterprise. Link different levels of AI proficiency with work outcomes in your productivity & collaboration suites like MS 365 or Workspace, and LOB performance metrics.

### GOVERNANCE

We unify fragmented and siloed enterprise data into a centralized platform, providing the necessary auditable evidence for organizational governance, oversight, and strategic decision support.

## HOW IT WORKS

We sync Gemini Enterprise telemetry to Temporall, delivering essential AI intelligence on the usage, performance, and impact of Agents, including key user adoption metrics. We then enrich this data using proprietary user attributes, HR, and LOB Performance data, unifying and centralizing these sources to directly link AI usage and proficiency with measurable business outcomes.

"This dynamic insight [*sic Temporall*] enables users to analyze, understand, measure change, and drive an organization into the future."

ANGELA SALMERON, EUROPEAN FUTURE OF WORK RESEARCH DIRECTOR
